

Using Social Engineering Techniques to Plan an Attack (3e)

Network Security, Firewalls, and VPNs, Third Edition - Supplemental Lab 03

Student:
Christopher Phan

Email:
cphan@udallas.edu

Time on Task:
2 hours, 24 minutes

Progress:
100%

Report Generated: Thursday, June 23, 2022 at 2:18 PM

Section 1: Hands-On Demonstration

Part 1: Observe Targeted Social Engineering Research

7. Make a screen capture showing the **whois** information for Global Enterprises.

12. Make a screen capture showing LouAnne's GetConnected profile.

15. Make a screen capture showing the first blog entry.

18. Make a screen capture showing the **second** blog entry.

22. Record the current firewall software version number.

pfSense 2.0

Part 2: Observe a Targeted Reverse Social Engineering Attack

Using Social Engineering Techniques to Plan an Attack (3e)

Network Security, Firewalls, and VPNs, Third Edition - Supplemental Lab 03

2. Make a screen capture showing the fake job ad.

Section 2: Applied Learning

Part 1: Perform Targeted Social Engineering Research

2. Make a screen capture showing the services offered by Corporation Techs.

3. Make a screen capture showing the Corporation Techs corporate officers.

6. Review the LinkedIn profiles and answer the following questions.

- Which college or university did each officer attend, and for which years?
- Where does each officer live?
- Not including Corporation Techs, where did each officer work the longest?

Andrew Symonds attended San Diego State University from 1979 to 1983. Symond currently lives in Addison, TX. He worked the longest in Wodash Incorporated. Mike Hutchins attended Virginia Tech University from 1992 to 1996. Hutchin currently lives in Addison, TX. He worked the longest at Aegis Secured. Dee Dasher attended Texas State University from 1985 to 1989. Dasher currently lives in Addison, TX. She worked the longest at Dante's Inc.

Part 2: Perform a Targeted Social Engineering Attack

3. Make a screen capture showing the contents of the email.

Corporation Techs

Using Social Engineering Techniques to Plan an Attack (3e)

Network Security, Firewalls, and VPNs, Third Edition - Supplemental Lab 03

5. Make a screen capture showing the resulting web page.

Section 3: Challenge and Analysis

Part 1: Investigate a Data Leak

3. Make a screen capture showing the results of the Nmap scan.

15. Make a screen capture showing the script that will open the file.

19. Make a screen capture showing the result of your actions.

Part 2: Continue the Investigation

Write a brief summary of your recommendations.

Recommendations I would make to Corporation Tech website is to apply a certificate for the website, to apply authentication methods so that the website cannot be tampered with as well as authenticate that it is true entity that is connected to Corporation Tech website. Digital Forensics would be important to find the culprit in who placed the "cntrl+enter" command shortcut into the scripting of the website. Social engineering techniques could possible to use such as the email phishing link back into the culprit, capable to see their IP address or more to find more information to get more identifying assets. Applying injection prevention techniques can stop this pricecheat.pdf from being within the scripting of the website.
